PB PBM PTS10

STAGE SETS

Control Panels Model P Series

Control console for basic productions. Perfect for control solutions in small cultural venues, auditoriums, arenas and any other place that requires a simple and effective control.

P Series: PB

- Basic control panels. Allows to move multiple axis as a group or individually.
- They provide two selecting keys for each control axis (engine): Each key has 3 positions: up; down and inactive.
- When driving the system with the operation button, all the engines in active positions, whether up or down, will start moving at the operation speed of the engine and will continue moving as long as the operation button is pushed or until the engine reaches one of its superior or inferior limits.
- The PB panels can be configured from 1 to 16 control axes. As an option it can be supplied with a remote control for the operation button. Emergency stop "e-stop" included.

- UP TO 16 CONTROL AXES
- PROGRAMMABLE AND PERSONALIZABLE PANELS
- INTEGRATED E-STOP
- SAFETY KEY
- OPTIONAL WIRED REMOTE CONTROL

STAGE SETS

P Series: PBM

- The next control option allows to add memories in the operation of motorized axis.
- The initial operation is similar to that of PB panels. They provide two selecting keys for each control axis (engine): Each key has 3 positions: up; down and inactive.
- When driving the system with the operation button, all the engines in active positions, whether up or down, will start moving at the operation speed of the engine and will continue moving as long as the operation button is pushed or until the engine reaches one of its superior or inferior limits.
- Once the position of each of the motorized axis is established, it can be saved as a scene. The system allows to save 6 scenes, each one contains an established position for each of the motorized axis.
- When calling the desired scene, the axes shift simultaneously to the saved position. This panel is very useful for operating lighting battens or acoustical shell ceiling. Emergency stop "e-stop" included.

- UP TO 16 CONTROL AXES
- PROGRAMMABLE AND PERSONALIZABLE PANELS
- INTEGRATED E-STOP
- SAFETY KEY
- 6 PROGRAMMABLE SCENES
- PRECISE POSITION LECTURE
- OPTIONAL WIRED REMOTE CONTROL

STAGE SETS

P Series: PTS10

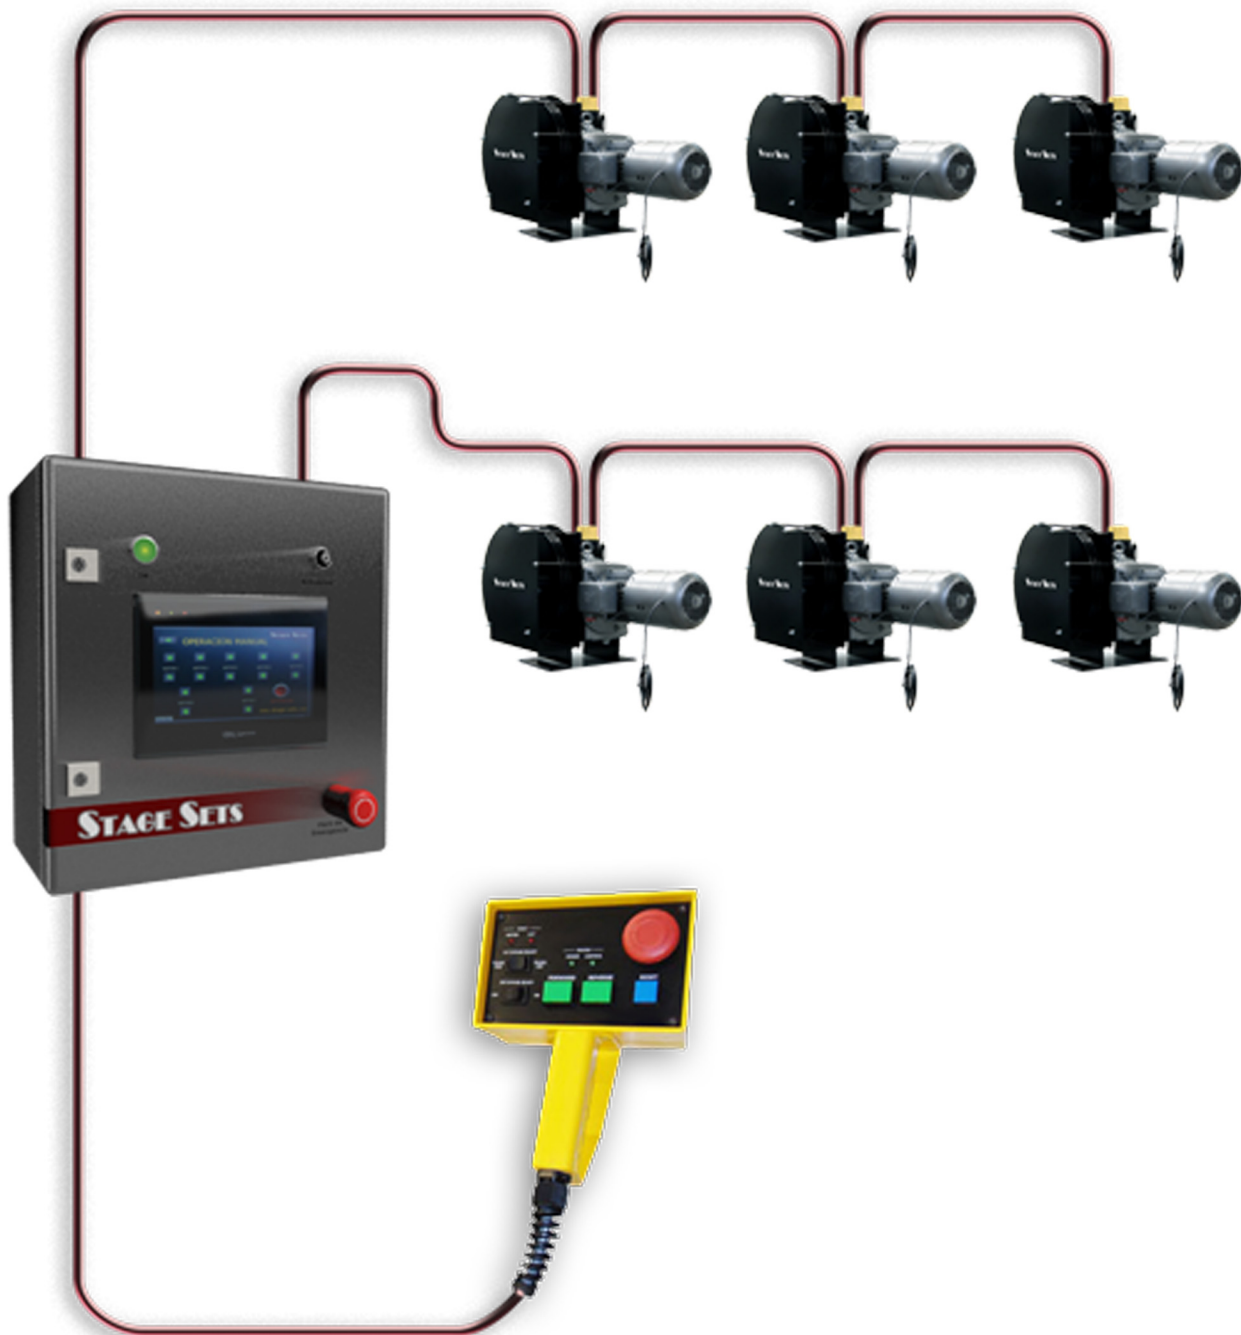

- The PTS panels are the entry option for automated theater mechanics.
- Its touch screen allows to control motorized axis individually or in groups.
- With a fast and precise individual position control, it allows to save 64 scenes and control up to 32 motorized axes: includes emergency stop and as an option it can have a wired remote control.
- The real position of the axes displays in the control screens and, if they exist, load sensor lectures.

- UP TO 32 CONTROL AXES
- 10" TOUCH SCREEN
- PERSONALIZABLE SCREEN
- 64 PROGRAMMABLE SCENES
- POSITION, SPEED AND TIME CONTROL
- SAFETY KEY
- PASSWORDS FOR THE DIFFERENT OPERATIVE LEVELS
- OPTIONAL WIRED REMOTE CONTROL
- ETHERNET COMMUNICATION
